***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Bancalari (3903869).

Bancalari discloses a treatment, including apnea syndrome, the method comprising applying to the frontal portions of a patient's neck a pressure less than ambient pressure in combination with providing an elevated pressure greater than the first pressure within the patient's airway. See column 4, lines 25-39 and column 3, lines 45-60.

Claim 4 is broader than claim 3, in that, it does not require application of pressure to the frontal portions of a patient's neck. The claim is fully anticipated by Bancalari.

Claim 7 is broader than Claim 4, in that, the method is no longer limited to the treatment of sleep apnea. The claim is fully anticipated by Bancalari.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Mundell, et al (4700697).

Mundell, et al discloses a method to ameliorate sleep apnea including providing a cervical appliance which prevents ventral flexion of the head while maintaining the head in a slightly dorsally flexed position during sleep.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4,6,8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mundell, et al (4700697) as applied to claims 4 and 7 above, and further in view of Bancalari (3903869).

Mundell, et al describes one modality for ameliorating sleep apnea. Bancalari teaches a two modality process for combating apnea, including negative pressures to the neck and thoracic region of the body in combination with positive pressure flow through the airway of the patient. In light of Bancalari, to use a positive pressure flow through the airway of the patient in combination with the cervical apparatus of Mundell in order to provide correct neck positioning to ensure an open airway for receipt of positive pressure flow into the airway, would have been obvious to one with ordinary skill in the art.

***Response to Arguments***

Applicant's arguments, see pages 4-7 of applicant's remarks, filed 5/13/03, with respect to defective reissue oath/declaration have been fully considered and are persuasive. These rejections have been withdrawn.
